ABOUT THE STATE HAPPENINGS OF INTEREST FROM

DIFFERENT SECTIONS

Putney has arranged for a community pienie with athletic events, basket by local talent to celebrate July 4.

The J. F. Gidder Mfg. Co., of Burlington has received from England an order for angle shears and presses, costing \$250. They are for the British admiralty.

Two women who were gathering ferns on Wantastiquet mountain in Brattleboro, encountered a rattlesnake, which one of them killed with a rock. As a trophy they brought home the snake's tail, which had nine rattles.

Silas Wright Tablet.

A feature of the Middlebury college commencement will be the presentation and unveiling of a tablet in commemoration of the 100th anniversary of the by Judge Warington Putnam of Brooklyn, chief justice of the appellate diviin the old chapel, where there are already one attendant rather than under a hit or many memorials of illustrious graduates miss plan where a number of school chilof Middlebury.

This commencement is also the 75th fowls. anniversary of the graduation of Edward J. Phelps, minister of England, and Henry Norman Hudson, the Shakespear ean critic. A movement has been start ed to endow a chair in the English department in commemoration of Dr. Hudson, who has been called Middlebury's greatest graduate in the field of pure

ORANGE COUNTY COURT.

Plaintiffs Given \$1 in Maidment vs. Frazier Last Week.

Chelsea, June 14.—The case of George and Gertrude Maidment vs. David J. Frazier was completed Wednesday when the jury, through its foreman, George C. Flint of Braintree, rendered a verdict for the plaintiffs to recover of the defend. Architect of Hotel Barre Looking Over ant the sum of \$1. Judgment has not been rendered on the verdict and the plaintiffs have filed a motion to set aside the judgment, while the defendant has filed a motion to restrict the recovery by the plaintiff of more costs than the amount of damages.

The third case tried by jury was that an action of trespass, the parties being at the December term of 1912 when the jury found for the plaintiff to recover ie sum of \$102.08 and costs. The deon appeal and in that court the judgment was reversed and the cause remand- found in Vermont. ed. This case was short, occupying the Frank Haynes of Orange, a verdict for the sum of \$35 damages. M. M. Wilson designing. of Randolph appeared for the plaintiff and Wallace Batchelder of Bethel and David S. Conant of Bradford appeared for the defendant.

Several cases set for trial having been entered settled and discontinued found the business of the court in such condi-

to-day. A few divorce cases were heard during lows: Florence Judd vs. John Judd, the nations. S. Conant appeared for the petitioner.

Conant of Bradford appeared for the pe-

Rev. Absalom Reginald Crewe of Randolph appeared before the court on Saturday, June 5, and submitted himself for examination and received his final papers and became a naturalized citizen of the United States.

State's Attorney Williams has filed several informations which will undoubtedly give the jury some work when the criminal docket is reached,

Where the Dishonor Lies,

The scandal at Annapolis is extremely painful. Without going into the ifs and ands of the testimony, that young men of the United States naval academy should come under the suspicion of cheating in examinations is humilisting to say the least. The country at large has been taught to regard these young men as a picked company among a picked class of college men, an aristocracy within an aristocracy. Their lives are supposed to

be dedicated to the service of the nation. It is not suggested that cheating is not practiced at other colleges. It is suggested that if there is any college where we have a right to expect that cheating shall exist less than in another, that place is the United States naval academy at An-

If there is any truth in the charges, we decline to believe that the fault lies as much in the young men themselves as n vertain fundamental defects of the mili tary idea which enters so largely into their training. War is the reversal of all the ordinarily human stendards. Militarists say so themselves. Train young men for war and you challenge these ordinary human standards in a hundred ways. hardly suspected by those who remise the training. In militarism, deception may be "strategy," in pence, if may be

"All's fair in love and war." The point is that neither love

make the unfair fair. There is no question but test Annap lis men, as men, are a fine type. It is all the more pity if certain ones among them have yielded to infinences which we all agree to be regrettable, but which seem to be inherent in any system of militar-lem, however modified. There are numhere of men (our army and nasy has been full of them) who never wield to these subversive influences. And there are some that do. We do not blame the men; we do blame the military idea,-Boston Giobe.

POULTRY BREEDING.

Community Poultry Breeding Work Is Started in Virginia. The 80 members of the Middletown,

Va., county high school poultry club have shipped 1,500 settings of purebred Barred Plymouth Rock eggs so far this season. The club represents a new idea in poulbaseball and music and a play all talent to celebrate July 4.

J. F. Gidder Mfg. Co., of Burling. can easily be adopted by many of the schools teaching agricultural subjects. A single flock of about 30 purebred Plymouth Rocks forms a nucleus for the distribution throughout the district of eggs for hatching. The students have formed a poultry club, and are furnished eggs from these purebred fowls. But the students are not the only ones to benefit from the flock. Their parents and any-one within the county can obtain a setting of eggs for hatching, in payment for which they return in the fall one of the chickens hatched from the eggs. The members of the club and other individuals who obtain eggs to start raising purebred stock, however, have to pledge graduation of Silas Wright, governor of themselves to hatch eggs from this source the state of New York, and U. S. senator. only. Thus from this single flock there The presentation address will be made is built up in the community practically

one purebred strain of poultry. The care of the poultry is part of the sion, supreme court of New York. The schoolhouse janitor's work, and thus the tablet will be of bronze and will be placed poultry is systematically cared for by "try their hand" at feeding the

> when not sold to club members or individuals for setting. To prevent inbreeding, however, the roosters of a different strain may be substituted each spring. One of the United States department of agriculture's specialists will this fall visit the school and farms in the vicinity of Middletown and help select the best of Middletown and Middletown and help select the best of Middletown and Middle poultry for breeding purposes. These breadth of the paths. Success lies, as a breadth of the paths. Success lies, as a lived here night onto 75 years and I breadth of the paths. Success lies, as a lived here night onto 75 years and I rule, in broad walks for the large garden and a strip barely three feet wide for the smaller area. No form of path is more generally pleasing than the grass raines and other deposits of the ancient walk, with its soft green carpet, especially likes and time been one again to apply at the school for more.

MAY REMODEL HOTEL.

Bardwell in Rutland.

Rutland, June 14.-George M. Bartlett of New York is in the city looking out the earth to the desired width over The Bardwell with a view to rec- (about a foot and a half deep), and lay ommending alterations in order to make ing old brick and stones in the bottom to the building more modern and give a depth of six inches. No outdoor retreat ever proves what it should be without the appropriate in-lets and outlets, and the charm of many

cially when appropriately edged, but it of the lines of scientific activity carried care, much mowing, as well as an alert vey. Besides being matters of geologic eye for weeds.

Gravel and Brick Paths. If a gravel path is preferred, a good foundation should be made by digging

ound in Vermont.

Mr. Bartlett is well known in the ing tints (as, for example, in the use of path is made by using for a foundation It is not possible to differentiate all the the same materials as in the first sixinch layer described above, and on this is spread the second layer of small Miss E. Jessamine Billings the Bride of stones, only mixed with lime and water and sand, to a depth of some four inches, On top of this should be put a layer At the residence of Rev. and Mrs. F. H. two and one-half inches thick of sand,

For the average small garden, no walk border of hardy flowers, its soft and subdued gray always lending additional beauty to the brilliancy of the blossoms. There are various methods of preparing the ground for a flag walk, the more dation of mortar underneath the flags Mrs. Bragg, a native of Waitsfield, is an to insure the stones being firmly set in

in firmly, in usefulness. flagged path, especially significant to the Lawrence building, Montpeller, Vt, lower lover, is the chance it gives of planting vines and low-growing flowers between the slabs and cracks, thus forming an unusual and charming feature of any small garden. Indeed, the close association of stone and flower as indicated here furnishes an air of leafy to goolness and effective wildness very uncommon in even the most claborate gardens. The best time to plant these flowers between the flags is while the path itself is being laid, for, as cutting and seedlings are to be preferred to ordinary seeds, it will give the gardener a chance to apread the abundant and fibrous roots without their being damaged.

Creeping Allsing Plants Between the Flags.

There is also the path which may be laid with tiles, which, when of soft colors and neatly laid in artistic designs, are often charming. But as they are rother expensive, they will prove to be somewhat impracticable for the amateur successives.

ESTATE OF BRIDGET HANLON

State of Vermont, District of Washington, sa. The Honorable Probate Court for the District Aforesaid; The Honorable Probate Court for the District Aforesaid; To all persons interested in the estate of Bridget Hanlon, late of the city of Barre, in said district, deceased, GREETING:

WHEREAS, said court has assigned the 20th day of June nout for all persons interested in the estate of said deceased, GREETING:

WHEREAS, said court has assigned the 20th day of June nout for all persons interested in the estate of said deceased and for a decree of the residue of said estate to the lawful claimants and fibrous roots without their being damaged.

Creeping Allsing Plants Between the Plags.

There is also the path which may be laid with tiles, which, when of soft colors and neatly laid in artistic designs, are often charming. But as they are respectively proved the and district.

THEREFORE, you are hereby notified to appear at the probate office in Montpeller, in said district, on the day assigned, then and its probate office in Montpeller, in said service.

THEREFORE, which, when of soft colors is and neatly laid in artistic designs, are often charming. But as they are proba between the slabs and cracks, thus form-

rather expensive, they will prove to be omewhat impracticable for the amateur June 14-21-28 gardener. In selecting plants for the gaps in a flagged walk, one must not forget that the primary object of a path is to give access to the garden; thus nly creeping plants, and preferably those which may be trodden upon with- evening, June 18, at 7:20 o'clock for out being damaged, should be made use vacancy in the fire department. Candiof. Plants of very bushy or erect habit dates are urged to secure applications may be suitable near the margins of a from the city clerk and to be present path, but they should not be so placed promptly at the hour mentioned that they will come into contact with the clother of a passer-by, which is al-

ways very angeying.
For a path of this nature, it is gen crally advisable to make use of seeds and quite young plants; rooted cuttings and seedlings, in fact, are always greaty to be preferred, as they usually have abundant fibrous roots and develop into big masses the first year, if planted in the spring. They really need little attention beyond that necessary for the oper removal of seeds and faded blos-Rooted cuttings are especially suluable if very narrow apets have to be filled, fee it is hardly possible under such circumstances to have large plants without doing them considerable injury. Of course, plants which have been carefully grown in pots, and so have little root disturbance, are excellent for this term. It is a sufe remedy for counting purpose, and for them this is a very tion, biliousness, scalaris, sick hysdache. rood season to plant form out.

ANCIENT GLACIERS.

The Early History of Great Lakes Traced Geological Survey.

Even to one trained in geology there is considerable novelty in the idea set gardens depends largely upon the walks and paths which afford inviting changes forth by scientific men that during the Two male birds are kept with the 30 for a stroll among the gay flower-beds. hens only during the breeding season, and eggs are sold in the open market, when not sold to also he members or indidles and holes in the ground make an and of feet in thickness. One scarce-Thus, in making notes for some of the ly blame the countryman to whom a new paths this year, it might be well to geologist was explaining that the range stop and consider the fact, first of all,

> will require proper drainage, thorough on by the United States geological surand geographic interest, the various glacial and other associated deposits are of great importance, particularly to the agriculturists in the northern part of the United States. The pulverized and mixed rock materials spread as glacial drift over the uneven surfaces of the older rock formations in this part of the country afford the deep, rich, and enduring soils whose yield in farm products con-stitutes so great a part of the nation's weath. The vast quantities of clay available for the manufacture of brick and able for the manufacture of brick and drain tile and the widely distributed deposits of sand and gravel available for road metal and concrete and other work -all the results of the great glaciersare resources of no small value. In the swamps of the glaciated area lie stored great quantities of peat awaiting the time when conditions may require their

time when conditions may require their use as fuel or fertilizer.

The marginal parts of many of the great ice sheets took the form of huge lobes or more or less distinct glaciers. It is not possible to differentiate all the lobes of the earlier stages of the glacial epoch, but the closing stages are fairly well defined by great morainal loops festooned across the northern states. The delineation of these most raines upon maps makes clear many interesting and important relations of surface configuration and drainage systems. important contribution ence of glacial geology, one of a series of similar reports, is monograph 53 of the United States geological survey, "The Pleistocene of Indiana and Michigan and the History of the Great Lakes, Frank Leverett and Frank B. Taylor. In this report the authors have continued the description of the glacial de posits and history of the Great Lakes egion. Their maps show the relations f the remarkable system of moraines formed by the glacial lobes which occupied the basins of Lake Michigan, Lake Huron, and Lake Erie.
